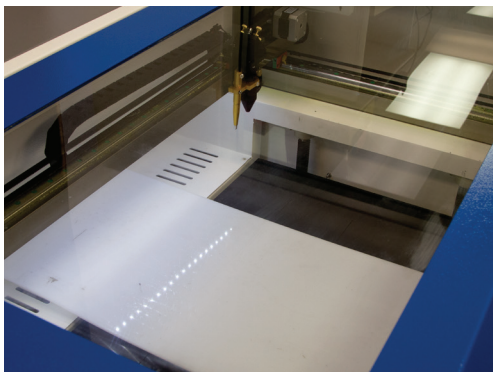
P-SERIES
P2416+ LASER



Large Visible Work Area

Large Visible work area allows you to see what you are cutting in real-time.

Passthrough Platform

Th3 P2416+ laser allows users to cut or laser materials which are bigger than the maximum build area.

Easy Access

Rear door for easy access to the laser tube and to insert larger materials.

P-SERIES 2416+ CO_2 LASER

Designed for professional production and heavy use environments, the P-Series 2416+ Laser Cutter works quickly and reliably.

- Comes standard with RetinaEngrave™ 3D Ethernet compatible with any Windows™ program that prints.
- Front pass through doors open so that larger pieces are compatible with the laser cutter.
- Moves 4x faster than the hobby laser series.
- Large working engrave-able area of 24" x 16".
- Motorized Z table, autofocus sensor, and beam combiner with visible red laser pointer is included.
- Can engrave bottles and round objects with the purchase of a rotary attachment (sold separately).
