

P-SERIES 36X24 CO₂ LASER

Industrial Laser Cutting Powerhouse.

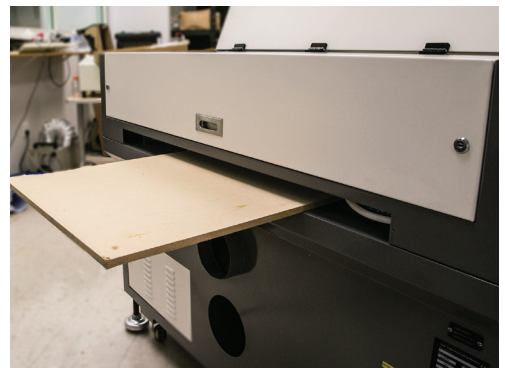

Application

Our software, RetinaEngrave 3d combined with an easy-to-use panel interface permits for a seamless process even for the most complex designs!

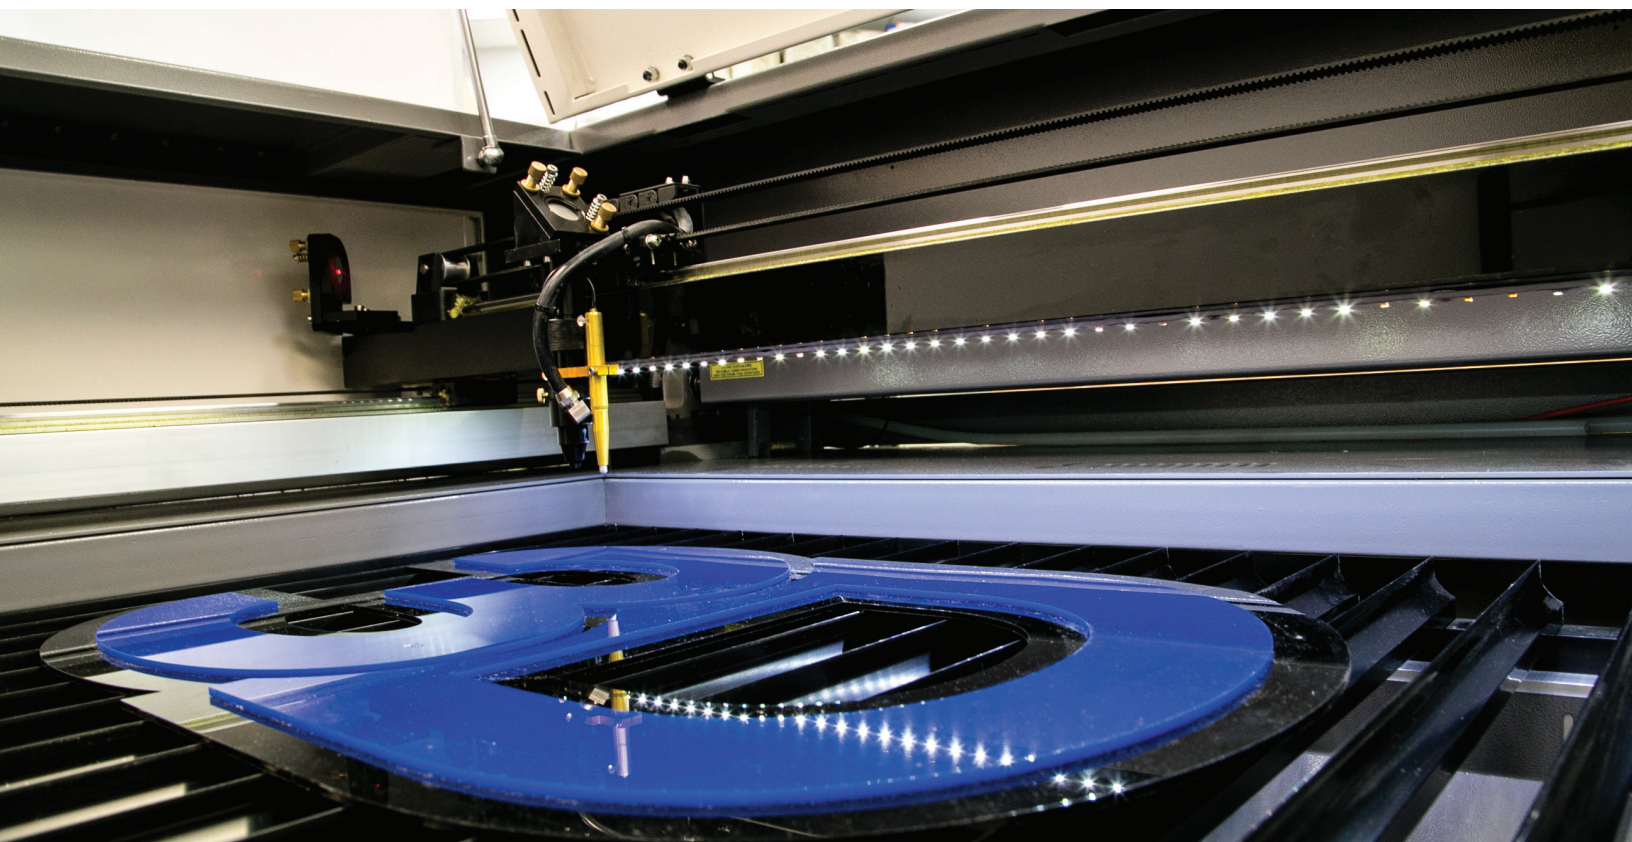

Laser Area

Motorized Z table, auto-focus sensor and red laser pointer facilitate the cutting or engraving of your project.

Passthrough platform

This machine gives you the ability to cut or laser on materials bigger than your maximum build area.

P-SERIES 36X24 CO₂ LASER

When you're looking at large cutting or engraving jobs, this large format laser provides you with the tools you need. The sturdy construction of this LF Series combined with the 36" x 24" (914 x 609 mm) engraving table provides you with an oversized work area to meet your needs on any project.
